

FORMULA RACER'S

*Take the wheel and Feel the track
in a formula race car*

In this program, you'll learn and apply all of the fundamentals and skills needed to control a very quick formula race car. Also, we will give you sort of seat time that it takes to really understand and enjoy the kind of incredible feedback that a real carbon fiber formula car gives its driver. Furthermore, Mr. Takeuchi who is a professional driver will give you a part of authentic debriefing sessions using our HD-on board camera and GPS logger data in order to see, understand and critique your driving just like the pros do.

For reservation : Fuji International Speedway
